

.1 OVERVIEW

Task 2 of the Scope of Work for this project was to review and evaluate Olympia's existing plans for consistency with the Comprehensive Plan policies, look for relationships between plans, and identify missing elements in the current approach to establishing transportation priorities.

This Appendix includes a list of Olympia's plans and documents reviewed for Task 2. The team's findings for this task have been incorporated into the mode evaluation Appendices (Appendices B, C, and D) and into the "Existing Conditions" chapter of the TMS report.

Outside data sources used for individual appendices are summarized within each appendix.

.2 PLANS REVIEWED

The team reviewed over 60 separate plans and documents, which make up Olympia's existing (or "de facto") mobility plan. We have included the list of plans reviewed on the last page of this memorandum. We reviewed each plan in a consistent review format to identify each plan's topic area or mode, consistency with the Comprehensive Plan transportation element, funding issues, connections to land use, and any identified benchmarks or performance measures..

	Document Name	Date
1	Bicycle Facilities Program	1997
2	Boulevard Road Corridor Study	2006
3	Bridging the Gap Project (TRPC)	2006
4	Capital Facilities Plan 2009-2014 (CFP) and priorities plan	2007
5	Capitol Way Corridor Study (TRPC)	2006
6	Closing the Gaps Summary (NE Neighborhood)	2008
7	Commuter Study	n/a
8	Comprehensive Plan: Land Use & Design, Transportation	2004
9	Concurrency Report	2007
10	Congestion Mitigation and Air Quality Improvement Implementation	2008
11	Congestion Mitigation and Air Quality Improvement memo	2007
